

Security is a matter  
of trust.

## SecuriSafe Easy

Your home is your castle – and it deserves to be treated like one. With the smart SecuriSafe Easy alarm system, your property and loved ones are protected effectively against burglaries and other threats. Whether an apartment or house, Securitron has the right system for protecting your home.

### No compromises

SecuriSafe Easy protects your home effectively against:

- Burglary
- Robbery
- Fire
- Floods
- Other threats

Once an incident is detected, your alarm system immediately activates the siren on site and notifies you instantly via the app on your smartphone. Additionally, professional monitoring can be guaranteed by connecting your alarm system to an alarm reception centre with response services, who ensure you and your home are in safe hands around the clock.

### All-round protection for your home

Whether being able to focus on work during the day, enjoying a relaxing night's sleep or having peace of mind on holiday, SecuriSafe Easy adapts perfectly to your everyday routines. The system consists of an intelligent central processing unit for monitoring and communication, intuitive indication and control maps, reliable detectors and a mobile application for smartphones. All devices have a modern design and can be connected to each other flexibly as wired or wireless solutions. The system allows for seamless expansion, as other technologies can be added easily at any time.

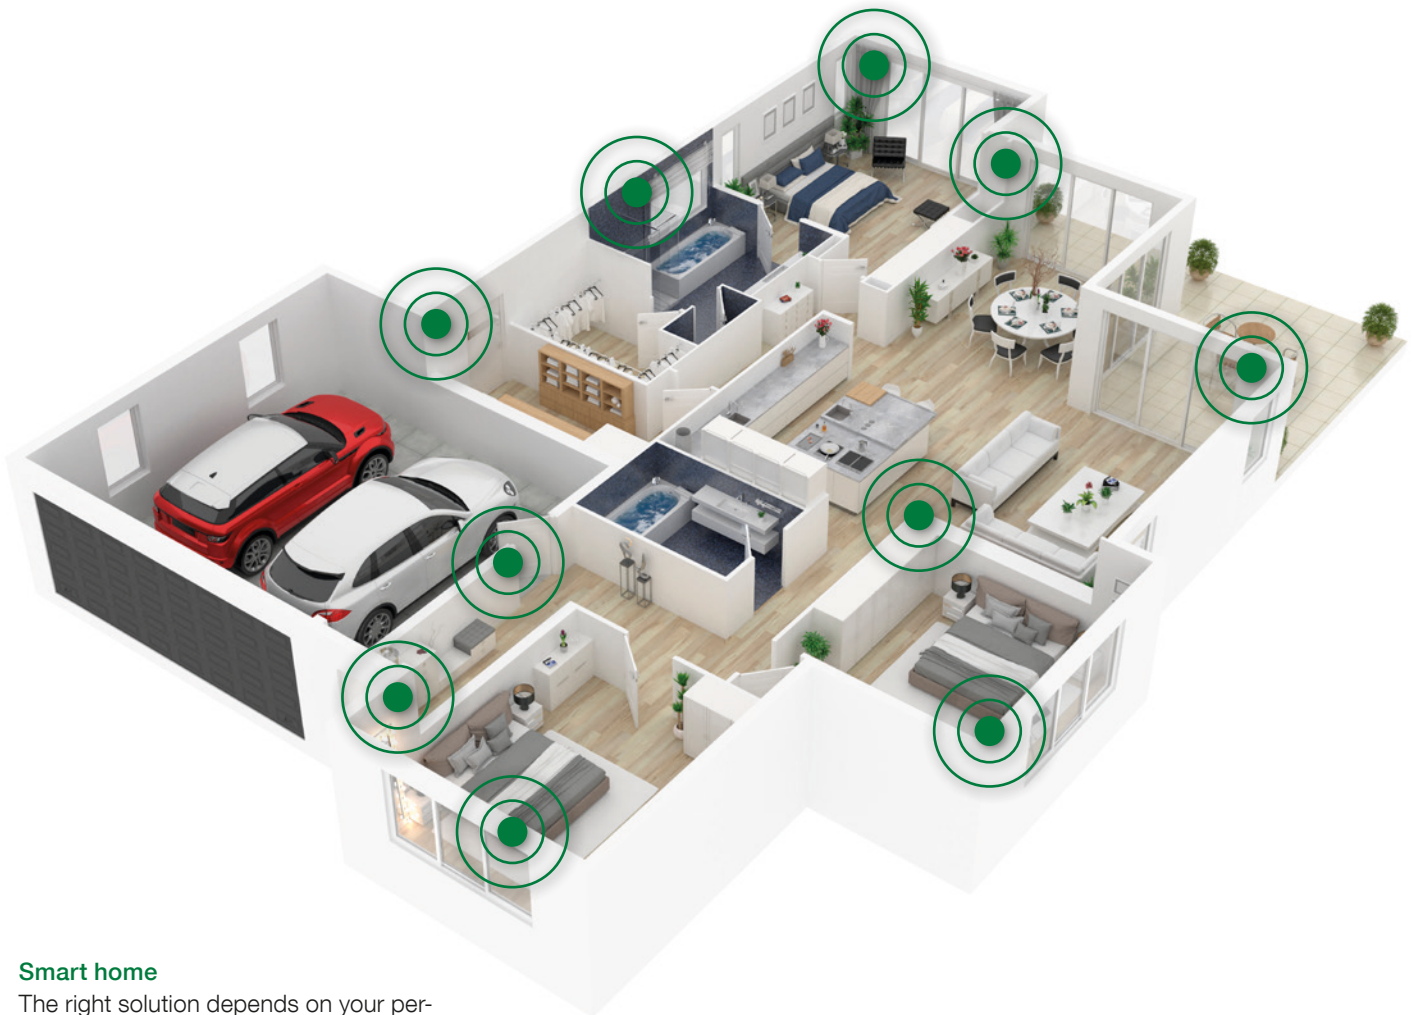

### Encrypted communication

Anyone attempting to manipulate or deactivate your alarm system without authorisation will quickly come away empty-handed – the sensors always communicate with the control panels using encryption and access to the system via mobile devices is also secure.

### Reliable operation

False alarms are a thing of the past. The intelligent SecuriSafe Easy alarm system detects interference automatically. For example, pets can be identified through intelligent algorithms so that they don't trigger an alarm. Furthermore, the system notifies you automatically in the event of power outages, connection problems and manipulation, meaning reliable operation is guaranteed at all times.

### Smart home

The right solution depends on your personal needs. From individual smoke alarm devices through to networked smart home security solutions, the possible applications are almost endless. Specific scenarios can be configured and integrated in advance, allowing the system to understand your patterns and common routines. Useful smart home functions can also make your life easier:

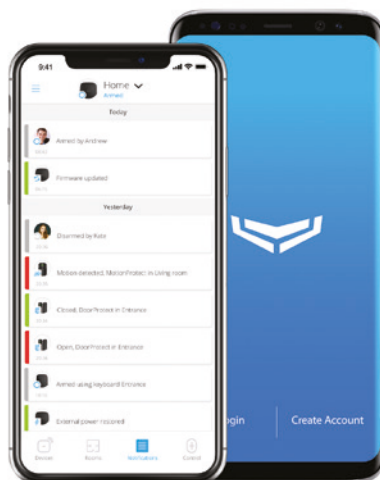

- Switching between day/night mode
- Opening and closing the garage door
- Activating external lights in case of uninvited guests
- Controlling the temperature and heating
- Controlling everyday devices such as lights, shutters, etc.

### Securiton: Your partner

Securiton is your partner when it comes to the optimal protection of your home. Since 1948, we have been the leading supplier of alarm and security systems across Switzerland. As a member of the Swiss Association of Installers of Security Systems (SES), we offer the highest quality – from consultation to system maintenance from a single source. Relax knowing you're in safe hands – and on attractive terms.

### The benefits to you

- Effective protection against burglaries, robberies, fires and floods
- Highest standards in terms of design, flexibility and operational security
- Intelligent smart home functions
- Professional consultation through to system maintenance from a single provider
- Long-standing expertise and experience from the market leader

### Smartphone app

The mobile application gives you a reliable overview of the status of your alarm and security system at all times:

- Simple operation
- Can be accessed anywhere and at any time
- Available for iOS and Android
